Technical Manager

Introduction

CCT-Pro BV (Coating Certification and Testing Professionals) is a young organisation active in physical testing of coating systems and consultancy. The company is specialised in the testing of anticorrosive coatings and capable to carry out all tests required for ISO 12944. In addition, the company offers consultancy services to companies seeking assistance in the development of test series and/or coating formulations. CCT-Pro BV is based in Berkel en Rodenrijs, Netherlands.

To strengthen our team, CCT-Pro BV is looking for a person with a background in paint testing and possibly paint development too.

The job covers a wide working area from execution of test series to guarding quality procedures to business development and commercial activities for the company.

CCT-Pro offers great flexibility in career development and is open to new initiatives. The position is a unique opportunity for those seeking a combination of technology and business and development. The candidate will be based in our Berkel and Rodenrijs office.

Job Requirements

- A degree in for instance polymer chemistry, material sciences or chemical engineering.
- Some years of working experience in developing and/or testing coatings.
- Good communication and presentation skills in English (verbal and in writing) is required. Knowledge of other languages is an advantage.
- Permanent residence permit in Netherlands is required.
- A service-orientated mindset and a flexible attitude.
- Ability to plan and coordinate multiple projects with varying timelines.
- Once started, the candidate must be able to plan and execute work independently.
- The job is on full time basis but part time can be discussed.
